

AIRCRAFT PILOTS

flying over Spurn and
Easington

Help us protect birds on the estuary
around Spurn and Easington.

Little terns, which are legally
protected from disturbance, breed in
this area from 01 March to 31 July.

The Humber mudflats are important for
over 100,000 wading birds throughout
the year.

To avoid disturbing these protected
birds, please ensure you do not fly
below 500 feet in this area of the
estuary. Thank you
